Product Name: - School ERP System
Product Code: - KUM-SCH-0062
Version: - 2.0.1

Brief Introduction

School ERP System is a complete solution for a school handling regular management work. By going through the flow of application one can easily maintain its student detail, fees detail, fee collection, employee detail, scholarship details, payroll management, library management, hostel management and transportation management, events management with advance record search.

Main Features of School ERP System-

School Fee Payment:-

School Fee payment is one of the core components in managing School fee like Tuition Fee, Admission Fee etc.In this module it automatically calculates the pending fee and penalty if any applicable to the selected student based on fee structure assigned.

Bus/Transport Fee Payment:

Bus Fee payment is also one of the core components for managing bus fee either monthly/yearly. In this module it automatically calculates the previous dues fee if the selected student having some previous bus fees.

Hostel Fee Payment:

Hostel Fee payment is also one of the core components for managing hostel fee either monthly/yearly. In this module it automatically calculates the previous dues fee if the selected student having some previous dues.

Boarding Fee Payment:

Boarding Fee payment is also one of the core components for managing boarding fee either monthly/yearly. In this module it automatically calculates the previous dues fee if the selected student having some previous dues.

Books Billing:
In this section we will perform the billing for Books accessories. all the billing related to books accessories comes under this section. you can also manage billing for other accessories from this section.

School Uniform Billing:

In this section we will perform the billing for school uniform. All the billing related to uniform accessories comes under this section. You can also manage billing for other accessories from this section.

User Access Rights:

School ERP Solution is highly customizable for Access rights. Access Rights management software allows you to provide or restrict access to specific functionalities for various logins. Create as many logins as you want by creating user.

Employee Payroll Management

Payroll management module allows you to manage all the tasks related to payroll. You can create different salary structure for your teaching staff and non teaching staff at the time of employee/staff registration. You can also manage the advance payment details for staff. Employee ledger is also included in this module.

Examination

In this software you can also manage/create the examination with time table for different types of examinations. You can also generate the admit card corresponding to this examination (Class Wise/Class & Section Wise/For Individual Student/for all students) etc.

School Management:

Manage your Schools/Colleges/Institutions/Taekwondo academy using this software. In this software you can also manage multiple schools in a single school software with some details like School name, Address, Contact number, Email, website etc.

Student Management (Student Profile):

It captures all details of student such as name, academic details, and contact information of the students/parents/guardians. You can also store information about student's previous qualification/achievements. It also creates a profile for each student with ledger.

Student Attendance:

Attendance module enables a school to record and monitor student attendance and absence. You can make the attendance either Class wise or Section Wise to a selected teacher as per your school time table definition. It also enable the send SMS for absence student to registered parents mobile number.

Penalty/Fine Management:
Penalty/Fine management module allows you to set fine for calculating fine for late fee payments as per your school rules. It helps you to calculate fine at the time of receiving fee from student.

Purchase & Supplier:

Purchase module helps you for purchasing certain items/products with the supplier. This module allows you to select the items for which you want to place purchase order and also you can specify their quantities and purchase that you agreed with the supplier.

Inventory Management:

Inventory module feature allows you to create your school's inventory items with their attributes such as measuring units, purchase price etc.Create your own categories and categorize your items as per the same. Add Images of your products (items).

Other Expense Management:

In this module you can manage other expenses. For example Room Rent, Tea, Breakfast, lunch, Electricity bill etc. This expense also shows in the general ledger and day book and finally you can check it in closing and opening balance.

Library Management:

Library management module allows you to maintain records of reserved, issued and return books. You can configure books issue related rules such as maximum number of books can be issued to a member (student/teacher), per day fine for (student/teacher).

Books Barcode Generation:

Using barcode generation you can generate the barcode either randomly or on the basis of Accession No. as per your quantity.

Complete SMS/Email Integration:

In our School ERP Solution, on each transaction SMS features are given. You can also send messages in types. For example: On any festive occasion, for school notice, on every alert using SMS Templates.
